Технические характеристики на многоосевые и порталные системы Multi Axis Systems компании **IMI NORGREN**

Multi Axis Systems

- endless design possibilities

Multi axis and gantry systems are custom designed to solve specific application challenges.

Essential in today's industrial world, and they play an increasingly significant role in machine construction.

Complex multi axis systems are essential in today's industrial world and play an increasingly significant role in machine construction.

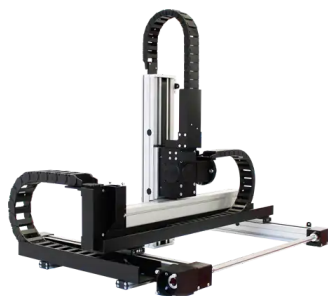

Custom-designed to solve your specific application challenges, we offer unlimited guide and drive combination possibilities and various configurations including H, XY, XZ & XYZ. To ensure we meet your exact specifications, our experienced technical team provides comprehensive application assessment, advice, and technical support from design to delivery.

Comprehensive application assessment including cycle time analysis, lifetime calculations and motor specification

Fast quote with CAD models within 48 hours

Project fulfilment in 4 to 6 weeks

Endless product configurations

Technical specifications and options

Total design flexibility for made-to-measure multi axis and gantry systems, meaning we have a solution for nearly any application. Modular design options, high-quality products, and exceptional technical support mean this range is flexible enough to handle even the most complex multi-axis motion requirements.

Profile widths: From 30 to 200 mm

Drive options: Toothbelt, ball/trapezoidal screw, rack and pinion, linear motor

Stroke lengths: From 100 mm to 4 m

Loads: up to 300 kg

Positioning Repeatability: ± 0.025 to 0.1 mm

3D multi axis systems

We offer custom-built multi axis systems to suit your specific application requirements. The modular nature of our multi axis systems means we can combine different profile styles, guide and drive options, and our wide range of accessories including motors, adaptors, cable chains, switches, safety brakes and clamps, to design a fully customised solution to meet your needs. With many years of experience in projects across different industries, our technical team can provide needs assessment, calculations and analysis of your application.

Exceptional technical support

We work in partnership with our customers to provide technical support from design to delivery.

Total design flexibility

We offer custom-built, application-specific solutions, that include special components such as cable drag chains where necessary.

Quick delivery

Quotes and CAD models are provided within 48 hours.
